SureSoftSD™

Microban® Polyester carpets are constructed from our SureSoftSD™ solution dyed polyester fibers, which are:

- Exceptionally soft
- Stain and soil resistant, making them easy to clean and maintain
- Fade resistant, ensuring this carpet won't fade in the sun

The color is all the way through the fiber, like a carrot.

The color of non solution dyed fibers is only on the surface, like a radish, making the carpet dull over time due to wear.
