**Installing Your Microwave**

- This microwave oven is designed for adaptation to the following three types of ventilation:
  - Outside Top Exhaust (Vertical Duct)
  - Recirculating (Non-vented Ductless)
  - Outside Back Exhaust (Horizontal Duct)
- The space between the cabinets must be 30" wide and free of obstructions.
- This microwave oven is for installation over ranges up to 36" wide.
- The microwave must be level. Use a level to make sure the cabinet bottom is level. If the cabinets have a front overhang only, with no back or side frame, install the mounting plate down the same distance as the front overhang depth. This will keep the microwave level.

FOR EASIER INSTALLATION AND PERSONAL SAFETY, WE RECOMMEND THAT TWO PEOPLE INSTALL THIS MICROWAVE OVEN. IMPORTANT: Do not grip or use handle during installation. NOTE: If your cabinet is metal, use the nylon grommet around the power cord hole to prevent cutting of the cord. NOTE: We recommend using filler blocks if the cabinet front hangs below the cabinet bottom shelf. IMPORTANT: If filler blocks are not used, case damage may occur from overtightening screws. NOTE: When mounting the microwave oven, thread power cord through hole in bottom of top cabinet. Do not pinch cord or lift oven by pulling cord.
