# Fit?

Buying a new cooktop is an exciting experience. We created this guide to help you collect the information you need to make choosing your new cooktop as easy as possible. Please use this measurement guide to ensure your new appliance will fit in its space properly. A measurement off by as little as 1/4 inch can turn the excitement of your new purchase into a major inconvenience. **If you choose to install the appliance yourself and it is returned because it will not fit, it will possibly cost you (the customer) a restocking fee.**

**White Glove Cooktop Premeasure is included for free with a purchase of a new cooktop in select areas. This includes all the measurements in this guide, however, installation will involve an additional fee. To schedule a premeasure, please contact us at, 1-800-336-9136**

What is the current brand of your cooktop? \_\_\_\_\_

Have you been happy with its performance? Yes  No

## Check Twice, Buy Once

Please check these measurements and configurations before selecting a new cooktop

Measure the depth of the hole in the countertop on the right and left sides.
