

HOW TO USE

Before use

Clean the refrigerator.

Clean the refrigerator thoroughly and wipe off all dust that accumulated during shipping.

⚠ CAUTION

- Do not scratch the refrigerator with a sharp object or use a detergent that contains alcohol, a flammable liquid or an abrasive when removing any tape or adhesive from the refrigerator.
- Do not peel off the model or serial number label or the technical information on the rear surface of the refrigerator.

NOTE

Remove adhesive residue by wiping it off with your thumb or dish detergent.

Open refrigerator and freezer doors to ventilate the interior.

The inside of the refrigerator may smell like plastic at first. Remove any adhesive tape from inside the refrigerator and open the refrigerator and the freezer doors for ventilation.

Connect the power supply.

Check if the power supply is connected before use.
Read the "Turning On The Power" section.

Turn off the icemaker if the refrigerator is not yet connected to the water supply.

Turn off the automatic icemaker and then plug the power plug of the refrigerator into the grounded electrical outlet.

* This is applicable only to certain models.

⚠ CAUTION

Running the automatic icemaker before connecting it to the water supply may cause the refrigerator to malfunction.

Wait for the refrigerator to cool.

Allow your refrigerator to run for at least two to three hours before putting food in it. Check the flow of cold air in the freezer compartment to ensure proper cooling.

⚠ CAUTION

Putting food in the refrigerator before it has cooled could cause the food to spoil, or a bad odor could linger inside the refrigerator.

The refrigerator makes a loud noise after initial operation.

This is normal. The volume will decrease as the temperature lowers.

Wi-Fi Eclipse Display

Depending on the model, some of the following functions may not be available.

Wi-Fi Eclipse Display Features

1 Smart Grid / Wi-Fi

Smart Grid

Press the Smart Grid button to turn the Smart Grid function On/Off. When the function is on, the icon illuminates. The Smart Grid function automatically turns on when the refrigerator is connected to the Wi-Fi network. When the refrigerator is responding to a Demand Response (DR) message from the electric company, the Grid text illuminates.

Wi-Fi

The Wi-Fi button, when used with the LG Smart Refrigerator smart phone app, allows the refrigerator to connect to a home Wi-Fi network. Refer to Smart Function for information on the initial setup of the application.

The Wi-Fi icon shows the status of the refrigerator's network connection. The icon illuminates when the refrigerator is connected to the Wi-Fi network.

Press and hold the Wi-Fi button for 3 seconds to connect to the network. The icon blinks while the connection is being made, then turns on once the connection is successfully made.

2 Lock

The Lock function disables every other button on the display.

- When power is initially connected to the refrigerator, the Lock function is off.
- To activate the Lock function, press and hold the Lock button until the lock indicator appears in the display. The other buttons are now disabled.
- To disable the Lock function, press and hold the Lock button for approximately three seconds.

3 Auto Open Door

The right refrigerator door opens automatically if you place a foot near the motion sensor at the bottom of the door. This is convenient when you have both hands full of groceries and need to open the refrigerator door. To set the Auto Open Door function, press the button repeatedly to toggle between the ON, Sound Off, and OFF settings.

Using the Auto Open Door Function

1. When the Auto Open Door Function is enabled, text is displayed on the floor near the motion sensor.

2. Pass one foot in front of the motion sensor and step on the displayed text. The right door opens. If the door opens less than 20 degrees and is not opened further, it will close automatically after 3 seconds.

**NOTE**

Place your foot close enough to the sensor that the text appears on top of the foot, not just on the toes.

CAUTION

Disable the Auto Open Door function if you have young children or people lacking in cognitive ability in the home. They could be injured if the door opens unexpectedly while they are nearby.

NOTE

- The displayed text may not be readable on some flooring materials, but this will not affect the performance of the Auto Open Door function.
- If flooring material is highly reflective (metal, glass tile), the motion sensor may malfunction and the Auto Open Door function may not work properly.
- Reflective objects placed in front of the motion sensor may cause the text to display, but the text disappears if no movement is detected.
- If a pet passes by below when a person stands in front of the product, automatic door open function may be operated.

4 Auto Open Drawer

When Auto Open Drawer is enabled, the freezer drawers automatically open when the freezer door is opened. The drawers automatically close when the freezer door is closed.

Setting Auto Open Drawer

Press Auto Drawer to activate or deactivate the function. When the function is activated, an icon appears on the display.

Using Auto Open Drawer

Open the freezer door at least 85 degrees to automatically open the drawers. Slowly close the door to automatically close the drawers.

**CAUTION**

- Do not use excessive force to push or pull the freezer drawers.
- Do not slam the freezer door shut while the drawers are open. Failure to follow these warnings may result in personal injury or damage to the product.

5 Refrigerator

- Indicates the set temperature of the refrigerator compartment in Celsius (°C) or Fahrenheit (°F). The refrigerator temperature control ranges from 33°F to 46°F (1°C to 8°C). The recommended temperature setting for the refrigerator compartment is 37°F (3°C).

To change the temperature mode from °F to °C (or vice versa) press and hold the Refrigerator and Freezer temperature buttons simultaneously until the temperature indication on the display window switches between Celsius and Fahrenheit.

6 Freezer

Indicates the set temperature of the freezer compartment in Celsius (°C) or Fahrenheit (°F). The freezer temperature control ranges from -6°F to 8°F (-21°C to -13°C). The recommended temperature setting for the freezer compartment is 0°F (-18°C).

To change the temperature mode from °F to °C (or vice versa) press and hold the Refrigerator and Freezer temperature buttons simultaneously for approximately five seconds. The temperature indication on the display window switches between Celsius and Fahrenheit.

NOTE

The displayed temperature is the target temperature, and not the actual temperature of the refrigerator. The actual refrigerator temperature depends on the food inside the refrigerator.

7 Voice Assistant

Changes voice assistant settings. This button allows the appliance to connect to a home **Wi-Fi** network. Refer to **SMART FUNCTIONS** for information on the initial setup of the **LG ThinQ** application.

8 Ice Plus / Air Filter

Ice Plus

This function increases both ice making and freezing capabilities.

- Press Ice Plus to illuminate the icon in the display and activate the function for 24 hours. After 24 hours, the icon and the function automatically turn off.
- To deactivate the function manually, press Ice Plus again.

Air Filter

The Fresh Air Filter helps remove odors from the refrigerator. The Fresh Air Filter will cycle on and off in increments of ten minutes on and 110 minutes off.

9 Display

The display indicates the current status of the refrigerator. Press any button to display the current setting for that function.

Using the Wi-Fi Eclipse Display

- To turn the display on, open a refrigerator or freezer door or knock twice on the InstaView™Door-in-Door® to activate the interior LED
- The display turns off automatically five seconds after all the doors are closed or five seconds after you have knocked twice on the InstaView™Door-in-Door®.
- The display buttons operate using static electricity. Wear gloves while cleaning to avoid activating button functions.
- Keep the display clean and free from foreign substances. Skin must contact the buttons directly for them to properly function.
- Wipe any moisture off the display before using it. Moisture on the display may interfere with the functioning of the buttons.

CAUTION

Display Mode (For Store Use Only)

The Display Mode disables all cooling in the refrigerator and freezer sections to conserve energy while on display in a retail store. When you turn on the interior display, "Demo Mode" appears in the display.

To deactivate / activate:

With InstaView™Door-in-Door® opened, press and hold the Refrigerator and Ice Plus buttons at the same time for five seconds. When demo mode is activated, the control panel will beep and the temperature settings will display as "Demo Mode" for five seconds and then return to normal temperature display. Use the same procedure to deactivate the Display Mode.

Sabbath Mode

Using the Sabbath Mode

Sabbath mode is used on the Jewish Sabbath and holidays.

- 1 To turn Sabbath mode on, close all doors or drawers.
- 2 Touch the display to activate it, then press and hold the **Wi-Fi** and **Freezer** buttons for 3 seconds until both LEDs turn on.

NOTE

- Sabbath mode automatically turns off after 96 hours.
- To turn Sabbath mode off manually, press and hold the **Wi-Fi** and **Freezer** buttons for 3 seconds.
- Once turned on, Sabbath mode is maintained even after a power outage.
- Selecting Sabbath mode automatically turns off the alarm, auto drawer, InstaView door, and auto door opening functions.
- You may hear a clicking sound when the refrigerator returns from the Sabbath mode to the normal operation mode. It is normal to hear the clicking sound made during the operation check.
- You can activate or deactivate the Sabbath mode and set schedule for the mode activation through the **LG ThinQ** application. Before activating this mode, close the doors and drawers.

In-Door Ice Bin

Depending on the model, some of the following functions may not be available.

CAUTION

- Keep hands and tools out of the ice compartment door and dispenser chute. Failure to do so may result in damage or personal injury.
- The icemaker stops producing ice when the in-door ice bin is full. If you need more ice, empty the ice bin into the extra ice bin in the freezer compartment. During use, ice may build up higher around the sensor than in the rest of the bin, causing the icemaker to stop producing ice before the bin is full. Shaking the ice bin to level the ice within it can reduce this problem.
- To avoid damaging the icemaker, do not store cans or other items in the ice bin.
- Keep the ice compartment door closed tightly. If the ice compartment door is not closed tightly, the cold air in the ice bin will freeze food in the refrigerator compartment. This could also cause the icemaker to stop producing ice.
- If the icemaker is turned OFF for an extended period of time, the ice compartment will gradually warm up to the temperature of the refrigerator compartment. To prevent ice cubes from melting and leaking from the dispenser, ALWAYS empty the ice bin when the icemaker is set to OFF for more than a few hours.

Detaching the In-Door Ice Bin

- 1 Gently pull the handle to open the ice compartment.

- To remove the in-door ice bin, grip the front handle, slightly lift the lower part, and slowly pull out the bin as shown.

Assembling the In-Door Ice Bin

- Carefully insert the in-door ice bin while slightly slanting it to avoid contact with the icemaker.

- Avoid touching the auto shutoff (feeler arm) when replacing the ice bin. See the label on the ice compartment door for details.

CAUTION

When handling the ice bin, keep hands away from the icemaker tray area to avoid personal injury.

Automatic Icemaker

Depending on the model, some of the following functions may not be available.

Ice is made in the automatic icemaker and sent to the dispenser. The icemaker will produce 70-182 cubes in a 24-hour period, depending on freezer compartment temperature, room temperature, number of door openings and other operating conditions.

- It takes about 12 to 24 hours for a newly installed refrigerator to begin making ice. Wait 72 hours for full ice production to occur.
- Ice making stops when the in-door ice bin is full. When full, the in-door ice bin holds approximately 6 to 8 (12-16 oz) glasses of ice.
- Foreign substances or frost on the auto shutoff (feeler arm) can interrupt ice production. Make sure the feeler arm is clean at all times for proper operation.
- To increase ice production, use the Ice Plus function. The function increases both ice making and freezing capabilities.

WARNING

Personal Injury Hazard

DO NOT place fingers or hands on the automatic ice making mechanism while the refrigerator is plugged in.

Turning the Automatic Icemaker On or Off

To turn the automatic icemaker On/Off, press and hold the Ice On/Off button on the control panel for 3 seconds.

Automatic Icemaker (continued)

CAUTION

- The first ice and water dispensed may include particles or odor from the water supply line or the water tank.
- Throw away the first few batches of ice. This is also necessary if the refrigerator has not been used for a long time.
- Never store beverage cans or other items in the ice bin for the purpose of rapid cooling. Doing so may damage the icemaker or the containers may burst.
- If discolored ice is dispensed, check the water filter and water supply. If the problem continues, contact a qualified service center. Do not use the ice or water until the problem is corrected.
- Keep children away from the dispenser. Children may play with or damage the controls.
- The ice passage may become blocked with frost if only crushed ice is used. Remove the frost that accumulates by removing the ice bin and clearing the passage with a rubber spatula. Dispensing cubed ice can also help prevent frost buildup.
- Never use thin crystal glass or crockery to collect ice. Such containers may chip or break resulting in glass fragments in the ice.
- Dispense ice into a glass before filling it with water or other beverages. Splashing may occur if ice is dispensed into a glass that already contains liquid.
- Never use a glass that is exceptionally narrow or deep. Ice may jam in the ice passage and refrigerator performance may be affected.
- Keep the glass at a proper distance from the ice outlet. A glass held too close to the outlet may prevent ice from dispensing.
- To avoid personal injury, keep hands out of the ice door and passage.
- Never remove the dispenser cover.
- If ice or water dispenses unexpectedly, turn off the water supply and contact a qualified service center.

When You Should Turn the Icemaker Off

- When the water supply will be shut off for several hours.
- When the ice bin is removed for more than one or two minutes.
- When the refrigerator will not be used for several days.

NOTE

The ice bin should be emptied when the Ice On/Off button is set to the Off mode.

Normal Sounds You May Hear

- The icemaker water valve will buzz as the icemaker fills with water. If the Ice on/off button is set to On, the icemaker will buzz even if it has not yet been hooked up to water. To stop the buzzing, press the Ice on/off button to set it to the Off position.

NOTE

Keeping the icemaker on before the water line is connected can damage the icemaker.

- You will hear the sound of cubes dropping into the bin and water running in the pipes as the icemaker refills.

Preparing for Vacation

Set the Ice On/Off button to Off and shut off the water supply to the refrigerator.

NOTE

The ice bin should be emptied any time the Ice On/Off button is turned Off.

If the ambient temperature is expected to drop below freezing, have a qualified technician drain the water supply system to prevent serious property damage due to flooding caused by ruptured water lines or connections.

Ice and Water Dispenser

CAUTION

Keep children away from the dispenser to prevent them from playing with or damaging the controls.

Dispenser

Using the Dispenser

- 1 Turn the icemaker on or off by pressing and holding Ice On/Off for three seconds.
- 2 To dispense cold water or ice, press the text on the dispenser control panel to select Cubed ice (🧊), Water (🍶), or Crushed ice (🧊).

CAUTION

Throw away the first few batches of ice (about 24 cubes). This is also necessary if the refrigerator has not been used for a long time.

Using the Measured Fill

The measured fill function dispenses pre-measured amounts of water automatically.

- 1 Select the desired amount from the Measured Fill buttons on the dispenser control panel.
- 2 Depress the dispenser switch with a container.
- 3 To stop the measured fill, release the dispenser switch.

NOTE

- If discolored ice is dispensed, check the water filter and water supply. If the problem continues, contact a qualified service center. Do not use the ice or water until the problem is corrected.
- The dispenser will not operate when either of the refrigerator doors are open.
- If dispensing water or ice into a container with a small opening, place it as close to the dispenser as possible.
- Some dripping may occur after dispensing. Hold the cup beneath the dispenser for a few seconds after dispensing to catch all of the drops.

Cleaning the Dispenser Stand

- 1 Raise up, holding both ends.

- 2 Wipe out dirty areas with a clean cloth.

Locking the Dispenser

Press and hold the Lock button on the interior display for three seconds to lock the dispenser and all of the display panel functions. Follow the same instructions to unlock.

Storing Food

Food Preservation Location

Each compartment inside the refrigerator is designed to store different types of food. Store your food in the optimal space to enjoy the freshest taste.

CAUTION

- Do not store food with high moisture content toward the top of the refrigerator. The moisture could come in direct contact with the cold air and freeze.
- Wash food before storing it in the refrigerator. Vegetables and fruit should be washed, and food packaging should be wiped down to prevent adjacent foods from being contaminated.
- If the refrigerator is kept in a hot and humid place, frequent opening of the door or storing a lot of vegetables in the refrigerator may cause condensation to form. Wipe off the condensation with a clean cloth or a paper towel.
- If the refrigerator door or freezer drawer is opened too often, warm air may penetrate the refrigerator and raise its temperature. It can also increase the cost to run the appliance.
- Do not overfill or pack items too tightly into door bins. Doing so may cause damage to the bin or personal injury if items are removed with excessive force.
- The temperature inside the FRESHSteel Container is slightly lower than in the shelf or door bin area.

NOTE

- If you are leaving home for a short period of time, like a short vacation, the refrigerator should be left on. Refrigerated foods that are able to be frozen will stay preserved longer if stored in the freezer.
- If you are leaving the refrigerator turned off for an extended period of time, remove all food and unplug the power cord. Clean the interior, and leave the door open to prevent fungi from growing in the refrigerator.

Food Storage Tips

The following tips may not be applicable depending on the model.

Wrap or store food in the refrigerator in airtight and moisture-proof material unless otherwise noted. This prevents food odor and taste transfer throughout the refrigerator. For dated products, check date code to ensure freshness.

Food	How to
Butter or Margarine	Keep opened butter in a covered dish or closed compartment. When storing an extra supply, wrap in freezer packaging and freeze.
Cheese	Store in the original wrapping until you are ready to use it. Once opened, rewrap tightly in plastic wrap or aluminum foil.
Milk	Wipe milk cartons. For coldest milk, place containers on interior shelf.
Eggs	Store in original carton on interior shelf, not on door shelf.
Fruit	Do not wash or hull the fruit until it is ready to be used. Sort and keep fruit in its original container, in a crisper, or store in a completely closed paper bag on a refrigerator shelf.
Leafy Vegetables	Remove store wrapping and trim or tear off bruised and discolored areas. Wash in cold water and drain. Place in plastic bag or plastic container and store in crisper.
Vegetables with skins (carrots, peppers)	Place in plastic bags or plastic container and store in crisper.
Fish	Store fresh fish and shellfish in the freezer section if they are not being consumed the same day of purchase. It is recommended to consume fresh fish and shellfish the same day purchased.
Leftovers	Cover leftovers with plastic wrap or aluminum foil, or store in plastic containers with tight lids.

Storing Frozen Food

NOTE

Check a freezer guide or a reliable cookbook for further information about preparing food for freezing or food storage times.

Freezing

Your freezer will not quick-freeze a large quantity of food. Do not put more unfrozen food into the freezer than will freeze within 24 hours (no more than 2 to 3 lbs. of food per cubic foot of freezer space). Leave enough space in the freezer for air to circulate around packages. Be careful to leave enough room at the front so the door can close tightly.

Storage times will vary according to the quality and type of food, the type of packaging or wrap used (how airtight and moisture-proof) and the storage temperature. Ice crystals inside a sealed package are normal. This simply means that moisture in the food and air inside the package have condensed, creating ice crystals.

NOTE

Allow hot foods to cool at room temperature for 30 minutes, then package and freeze. Cooling hot foods before freezing saves energy.

Storing Frozen Food (continued)

Packaging

Successful freezing depends on correct packaging. When you close and seal the package, it must not allow air or moisture in or out. If it does, you could have food odor and taste transfer throughout the refrigerator and could also dry out frozen food.

Packaging recommendations:

- Rigid plastic containers with tight-fitting lids
- Straight-sided canning/freezing jars
- Heavy-duty aluminum foil
- Plastic-coated paper
- Non-permeable plastic wraps
- Specified freezer-grade self-sealing plastic bags

Follow package or container instructions for proper freezing methods.

Do not use

- Bread wrappers
- Non-polyethylene plastic containers
- Containers without tight lids
- Wax paper or wax-coated freezer wrap
- Thin, semi-permeable wrap

Adjusting the Refrigerator Shelves

The shelves in the refrigerator are adjustable to meet individual storage needs. Your model may have either glass or wire shelves.

Adjusting the shelves to fit items of different heights will make finding the exact item you want easier. Doing so will also reduce the amount of time the refrigerator door is open which will save energy.

Detaching the Shelf

Tilt up the front of the shelf and lift it straight up. Pull the shelf out.

Assembling the Shelf

Tilt the front of the shelf up and guide the rear shelf hooks into the slots at the desired height. Then, lower the front of the shelf so that the hooks drop into the slots.

CAUTION

Make sure that shelves are level from one side to the other. Failure to do so may result in the shelf falling or food spilling.

NOTE

- The left side shelf has "LEFT" marking.
- If left and right side shelves are switched, they will not be assembled.

When Closing the Door

CAUTION

- To reduce the risk of door scratches and breaking the center door mullion, make sure that the refrigerator door mullion is always folded in.
- The door alarm sounds every 30 seconds if the door remains open longer than one minute. Ensure that the folding mullion is folded in before closing the left-hand door.

CustomChill™ Pantry

This space is used to store meat, fish, dairy products, beverages, and other items that need to be kept chilled.

Setting the CustomChill™ Pantry

Choose a temperature setting for the CustomChill™ pantry by pressing the Select button repeatedly to toggle between Meat, Deli, or Produce.

The temperature setting becomes progressively colder from Produce → Deli → Meat.

CAUTION

- Vegetables or fruit may freeze if placed in the CustomChill™ pantry when it is set to Meat or Deli.
- To keep frozen meat from thawing, store it in the freezer not the pantry. During the food storage, be careful not to block the cold air outlet.
- When storing food, take care not to block the cold air outlet at the back of the pantry drawer.

NOTE

- If storing meat or fish for more than a few days, store it in the freezer.
- The optimal storage temperature for meat or fish in the refrigerator is at or below 37°F (3°C).

Crisper Drawers

Removing the Crisper Drawers

- 1 Pull the crisper drawer out until it stops.

- 2 Slightly lift the crisper drawer to remove it from the support.

! CAUTION

- Always empty the crispers before removing them, and use both hands when removing and assembling them.
- Make sure that the refrigerator doors are fully open before removing and assembling the crispers.

Assembling the Crisper Drawers

- 1 Pull out the crisper drawer support until it stops. Angle the crisper drawer into the opening to place it on the support.

- 2 Slide the crisper drawer back on the support until it drops into place and then close the crisper drawer.

Removing the Crisper Support Box

- 1 Fully open the fridge door and pull out all the shelves.

CAUTION

- To avoid injury, always empty the shelves and crisper drawers before removing them.

- 2 Lift the front of the crisper cover until you hear a loud click.

- 3 Tilt the cover slightly and support it with one hand while pulling it out.

- 4 Open the convertible pantry and lift the front side of the crisper support box with both hands.

- 5 Slide one hand under the crisper support box and tilt the box up slightly to remove it.

Assembling the Crisper Support Box

- 1 Use one hand to support the bottom of the crisper support box while aligning the inner edge of the box with the groove inside the refrigerator. Lower the box into place.

- 2 Angle the crisper cover into the refrigerator and then lower it into place.

- 3 Slide the crisper cover back until it stops.

Removing the CustomChill™ Pantry Insert

Remove the contents from the CustomChill™ pantry before removing the insert. To remove, open the drawer to full extension, lift the front of the insert, and pull it out.

Hidden Bar Tray

The Hidden Bar Tray compartment is slightly cooler than the shelf or door bin areas, so it is a convenient place to store dairy snacks or other small items you want to keep especially cold. It is also a handy place to defrost meat.

NOTE

To open cover, push handle toward rear of bin to release catch.
To close cover, slide cover over bin until catch clicks into place.

CAUTION

- Be careful when handling and storing larger eggs. They can be broken if the cover is not completely closed and the drawer above is pushed in.
- Store foods like tofu, celery or lettuce which have high water content or freeze easily on the interior shelves at the front.

InstaView™ Door-in-Door®

Knock twice on the center of the glass panel to reveal the contents of the door bins without opening the door and allowing the cold air to escape.

- Knocking twice on the glass panel turns the interior LED on or off.
- The LED turns off automatically after 5 seconds.
- The InstaView™ function is disabled when the right refrigerator door is open, for two seconds after closing the door, and when the ice dispenser is in use.

WARNING

Do not hit the glass door panel with excessive force. Do not allow hard objects like cookware or glass bottles to hit the glass door panel. The glass could break, resulting in a risk of personal injury or product damage.

NOTE

- Tapping the edges of the glass panel may not activate the InstaView™ function.
- The taps on the glass panel must be hard enough to be audible.
- Loud noises near the refrigerator may activate the InstaView™ function.
- The InstaView™ Door-in-Door® will not open if the right refrigerator door is open.

EasyLift Bin

Move the EasyLift bin up and down easily and conveniently as necessary.

- Remove all items from the EasyLift bin before moving it up or down.
- Adjusting the EasyLift Bin allows taller food items to be stored more conveniently.

- 1 To raise the EasyLift bin, hold the bottom of the bin in the center and push the bin up until it clicks into place.

- 2 To lower the EasyLift bin, press up to release the levers at the bottom of the bin and lower the bin until it clicks into place.

CAUTION

- To avoid personal injury or damage to the bin or its contents, empty the EasyLift bin before moving it up or down.

Freezer Drawer

Use the upper compartments to store packaged frozen foods and frequently-used foods.

Use the lower compartments for larger frozen foods and items stored for longer periods.

- The sliding freezer drawers allow easy access and convenience of use.

Removing the Freezer Drawer

- 1 Pull the freezer drawer out until it stops. Empty all contents out of the drawer before removing it.

- 2 Lift the empty freezer drawer slightly to remove it from the support.

CAUTION

- The drawers are heavy. Always use two hands when removing or assembling the drawers to avoid product damage or personal injury. Always empty drawers before removing them.
- Always open the freezer doors completely before removing or assembling the drawers.

Assembling the Freezer Drawer

- 1 Pull out the drawer support until it stops. Angle the drawer into the space and set it on the support.

- 2 Slide the drawer back until it lowers into place on the support. Close the drawer.

CAUTION

- The drawers are heavy. Always use two hands when removing or assembling the drawers to avoid product damage or personal injury. Always empty drawers before removing or assembling them.
- Always open the freezer doors completely before removing or assembling the drawers.

Removing the Drawer Support

- 1 Press the levers on either side of the drawer support.

- 2 Keeping both levers pressed, lift the drawer support slightly and remove it from the rail system.

Assembling the Drawer Support

- 1 Pull both drawer rails out until they stop.

- 2 Line up the bottom edges on the sides of the drawer support with the groove in each rail and then lower the support until it clicks into place.

Refrigerator/Freezer Door Bins

You can store small packaged frozen food in the freezer door bins, or small packaged refrigerated food or beverages in the refrigerator door bins, such as milk, water, juice, beer, etc.

Do not store ice cream or foods intended for long-term storage in the freezer door bins.

1. Left Refrigerator Door Bins

To remove the door bins, hold the bin with both hands and lift up to remove it.

To replace the freezer door bin, align both sides of the bin with the guides and push the bin down until it snaps into place.

Using the Door-in-Door Bin Bars

The metal bars attached to the Door-in-Door bins can be used as either rails or dividers.

- 1 To keep tall items secure in the door bin, unfold the bar and extend it upward from the top of the bin as a rail.
- 2 To keep bin contents organized, unfold the bar and extend it back into the bin as a divider.
- 3 Fold the bar down into the front of the bin when not in use.

2. Freezer Bins and Lower InstaView™ Door-in-Door® bin

To remove the door bins, tilt the front of the bin up slightly while pulling the sides forward.

To replace, align the bottom bin tabs with the rail slots then push the bin in until it clicks into place.

3. Upper InstaView™ Door-in-Door® bin

Removing

- 1 Open the latches underneath the bin by rotating them inwards. Tilt the front of the bin up until the tabs on the top sides clear the rails, then push the bin slightly backward. (It may help to open the glass InstaView™ door.)

- 2 Hold both ends of the bin and lift.

Assembling

- 1 Make sure the bin latches are fully open. Slightly tilt the front of the bin up to align and insert the plastic tabs on the sides of the bin into the indents in the rails. Hold the sides of the bin and pull it slightly forward to correctly position the latches.

- 2 Close the latches by rotating them toward the sides of the bin.

MAINTENANCE

Cleaning

- Both the refrigerator and freezer sections defrost automatically; however, clean both sections about once a month to prevent odors.
- Wipe up spills immediately.
- Always unplug the refrigerator before cleaning.

General Cleaning Tips

- Unplug refrigerator or disconnect power.
- Remove all removable parts, such as shelves, crispers, etc.
- Use a clean sponge or soft cloth and a mild detergent in warm water. Do not use abrasive or harsh cleaners.
- Hand wash, rinse and dry all surfaces thoroughly.

Exterior

Waxing external painted metal surfaces helps provide rust protection. Do not wax plastic parts. Wax painted metal surfaces at least twice a year using appliance wax (or auto paste wax). Apply wax with a clean, soft cloth.

For products with a stainless steel exterior, use a clean sponge or soft cloth and a mild detergent in warm water. Do not use abrasive or harsh cleaners. Dry thoroughly with a soft cloth.

CAUTION

- Do not use a rough cloth or sponge when cleaning the interior and exterior of the refrigerator.
- Do not place your hand on the bottom surface of the refrigerator when opening and closing.

WARNING

Use non-flammable cleaner. Failure to do so can result in fire, explosion, or death.

Inside Walls (allow freezer to warm up so the cloth will not stick)

To help remove odors, you can wash the inside of the refrigerator with a mixture of baking soda and warm water. Mix 2 tablespoons of baking soda to 1 quart of water (26 g soda to 1 liter water) Be sure the baking soda is completely dissolved so it does not scratch the surfaces of the refrigerator.

Door Liners and Gaskets

Use a clean sponge or soft cloth and a mild detergent in warm water. Do not use cleaning waxes, concentrated detergents, bleaches, or cleaners containing petroleum on plastic refrigerator parts.

Plastic Parts (covers and panels)

Use a clean sponge or soft cloth and a mild detergent in warm water. Do not use glass cleaners, abrasive cleansers, or flammable fluids. These can scratch or damage the material.

Condenser Coils

Use a vacuum cleaner with an attachment to clean the condenser cover and vents. Do not remove the panel covering the condenser coil area.

Replacing the Fresh Air Filter

Replace the air filter:

- Approximately every six months.
- When the Replace Filter icon is displayed.

1 Remove the old filter.

Grab and hold lower right and left side of cover and tilt upward. The air filter is on the inside of the cover. Press outward on the sides of the central cover compartment to release the tabs of the air filter. Remove the air filter.

2 Install a new air filter.

Insert the side tab of the new filter into the slot on the side of the central cover compartment. Snap the other side of the filter down into place. It may help to press the side of the central compartment outward while pressing down on the filter. Make sure the side of the filter labeled "Back" is facing out. Snap the cover of the filter back onto the filter compartment in the refrigerator.

After changing the filter, push and hold the Ice Plus / Air Filter button for three seconds to reset the filter sensor.

Replacing the Water Filter

NOTE

This refrigerator does not require a filter bypass plug when the filter is not in place.

Replace the water filter:

- Approximately every six months.
- When the water filter indicator blinks.
- When the water dispenser output decreases.
- When the ice cubes are smaller than normal.

1 Remove the old water filter.

Lift up and remove the lower door bin. Swing the right end of the water filter out of the compartment and then grasp and rotate the filter counterclockwise to remove it from the filter head.

NOTE

Replacing the water filter could cause a small amount of water to drain. Place a cup under the filter head to catch any water.

2 Replace with a new water filter.

Insert the new filter into the filter head and rotate it clockwise until the arrow on the new filter lines up with the arrow on the filter head. Swing the filter back into the compartment.

3 Assemble the door bin.

After changing the filter, push and hold the Water Filter button for three seconds to reset the filter.

Performance Data Sheet

Use Replacement Cartridge: ADQ73613401

The concentration of the indicated substances in water entering the system was reduced to a concentration less than or equal to the permissible limit for water leaving the system as specified in NSF/ANSI Standard 42 and Standard 53.

System tested and certified by NSF International against NSF/ANSI Standard 42 and Standard 53 for the reduction of substances listed below.

Capacity 200 Gallons (757 Liters) Contaminant Reduction Determined by NSF testing.

Contaminant Reduction	Average Influent	NSF specified Challenge Concentration	Avg % Reduction	Average Product Water Concentration	Max Permissible Product Water Concentration	NSF Reduction requirements
Chlorine Taste and Odor	2.0 mg/L	2.0 mg/L \pm 10%	97.5%	0.05 mg/L	N/A	\geq 50%
Nominal Particulate Class I, \geq 0.5 to < 1.0 μ m	5,600,000 pts/mL	At least 10,000 particles/mL	99.3%	73,000 pts/ml	N/A	\geq 85%
Asbestos	170 MFL	10 ⁷ to 10 ⁸ MFL; fibers greater than 10 μ m in length	>99%	< 1MLF	N/A	\geq 99%
Atrazine	0.0087 mg/L	0.009 mg/L \pm 10%	94.2%	0.0005 mg/L	0.003 mg/L	N/A
Benzene	0.017 mg/L	0.015 mg/L \pm 10%	97.0%	< 0.0005 mg/L	0.005 mg/L	N/A
Carbofuran	0.073 mg/L	0.08 mg/L \pm 10%	98.8%	0.001 mg/L	0.04 mg/L	N/A
Lindane	0.002 mg/L	0.002 mg/L \pm 10%	98.8%	0.00002 mg/L	0.0002 mg/L	N/A
P-Dichlorobenzene	0.263 mg/L	0.225 mg/L \pm 10%	99.6%	0.001 mg/L	0.075 mg/L	N/A
Toxaphene	0.015 mg/L	0.015 mg/L \pm 10%	93.5%	0.001 mg/L	0.003 mg/L	N/A
2,4-D	0.25 mg/L	0.210 mg/L \pm 10%	99.5%	0.0012 mg/L	0.07 mg/L	N/A
Lead pH @6.5	0.150 mg/L	0.15 mg/L \pm 10%	>99.3%	0.001 mg/L	0.010 mg/L	N/A
Lead pH @8.5	0.150 mg/L	0.15 mg/L \pm 10%	>99.3%	0.001 mg/L	0.010 mg/L	N/A
Mercury @ pH 6.5	0.006 mg/L	0.006 mg/L \pm 10%	96.5	0.0002 mg/L	0.002 mg/L	N/A
Mercury @ pH 8.5	0.0062 mg/L	0.006 mg/L \pm 10%	86.9	0.0081 mg/L	0.002 mg/L	N/A
Cyst*	200,000 cysts/L	Minimum 50,000 cysts/L	>99.99%	<1 cyst/L	N/A	\geq 99.95%

* Based on the use of Cryptosporidium parvum oocysts.

Application Guidelines / Water Supply Parameters

Note that while the testing was performed under standard laboratory conditions, actual performance may vary.

It is essential that the manufacturer’s recommended installation, maintenance and filter replacement requirements be carried out for the product to perform as advertised.

Service Flow	0.5 gpm (1.9 lpm)
Water Supply	Community or private well — Potable Water
Water Pressure	20 -120 psi (138 - 827 kPa)
Water Temperature	33-100°F (0.6 -37.8°C)
Capacity	200 gallons (757 liters)

Replacement Cartridge: ADQ73613401

For estimated costs of replacement elements please call 1-877-714-7486 or visit our website at www.LGSIGNATURE.com

Refer to the “warranty” section of the Refrigerator Owner’s Manual for Limited Warranty information.

NSF System Trade Name Code : ADQ73613401-S
NSF Replacement Code : ADQ73613401

SAFETY INFORMATION

Read, understand, and follow all safety Information contained in these instructions prior to installation and use of this product. Retain these instructions for future reference.

WARNING

To reduce the risk associated with the ingestion of contaminants:

- **Do not** use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system. Systems certified for cyst reduction may be used on disinfected water that may contain filterable cysts.

CAUTION

Please note that water could leak while replacing the filter which could result in property damage.

To reduce the risk associated with property damage due to water leakage:

- **Read and follow** Use Instructions before installation and use of this system.
- Installation **must** comply with existing state or local plumbing codes.
- **Protect filter from freezing** Drain filter when room temperature drops below 33°F (0.6°C).
- **Do not** install if water pressure exceeds 120 psi (827 kPa). If your water pressure exceeds 80 psi, you must install a pressure limiting valve. Contact a plumbing professional if you are uncertain how to check your water pressure.
- **Do not** install where water hammer conditions may occur. If water hammer conditions exist you must install a water hammer arrester. Contact a plumbing professional if you are uncertain how to check for this condition.
- **Do not** install on hot water supply lines. Install on cold water lines only. The maximum operating water temperature of this filter system is 100°F (37.8°C).
- Where a backflow prevention device is installed on a water system, a device for controlling pressure due to thermal expansion must be installed.
- The disposable filter cartridge **must** be replaced every six months, at the rated capacity or if a noticeable reduction in flow rate occurs.
