# WELCOME & CONGRATULATIONS

## Product Registration

### Register Your Product

The **PRODUCT REGISTRATION CARD** should be filled in completely, signed and returned to Electrolux Home Products.

Congratulations on your purchase of a new appliance! At **Electrolux Home Products**, we are very proud of our product and are completely committed to providing you with the best service possible. Your satisfaction is our number one priority.

We know you'll enjoy your new appliance and **Thank You** for choosing our product. We hope you consider us for future purchases.

### PLEASE CAREFULLY READ AND SAVE THESE INSTRUCTIONS

This Use & Care Manual contains general operating instructions for your appliance and feature information for several models. Your product **may not** have all the described features. The graphics shown are representative. The graphics on your appliance may not look exactly like those shown. These instructions are not meant to cover every possible condition and situation that may occur. Common sense and caution must be practiced when installing, operating and maintaining any appliance.

## Serial Plate Location

Cooktop Serial Plate Location

**Please record your model and serial numbers below for future reference.**

Model Number: \_\_\_\_\_

Serial Number: \_\_\_\_\_

Purchase Date: \_\_\_\_\_

### **NOTE**

Please attach sales receipt here for future reference.

# IMPORTANT SAFETY INSTRUCTIONS

Read all instructions before using this appliance. This manual contains important safety symbols and instructions. Pay attention to these symbols and follow all instructions given.

Do not attempt to install or operate your appliance until you have read the safety precautions in this manual. Safety items throughout this manual are labeled with a WARNING or CAUTION statement based on the risk type.

Warnings and important instructions appearing in this guide are not meant to cover all possible conditions and situations that may occur. Common sense, caution, and care must be exercised with installing, maintaining, or operating your appliance.

## DEFINITIONS

 This is the safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that follow this symbol to avoid possible injury or death.

### WARNING

This symbol will help alert you to situations that may cause serious bodily harm, death or property damage.

### CAUTION

This symbol will help alert you to situations that may cause bodily injury or property damage.

### IMPORTANT

IMPORTANT indicates installation, operation or maintenance information which is important but not hazard-related.

### NOTE

Indicates a short, informal reference – something written down to assist the memory or for future reference.

### WARNING

If the information in this manual is not followed exactly, a fire or explosion may result causing property damage, personal injury or death.

**FOR YOUR SAFETY:** Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.

## IMPORTANT INSTRUCTIONS FOR UNPACKING AND INSTALLATION

IMPORTANT - Read and follow the below instructions and precautions for unpacking, installing, and servicing your appliance:

- Remove all tape and packaging wrap before using the appliance. Destroy the carton and plastic bags after unpacking the appliance. Never allow children to play with packaging material. Do not remove the wiring label and other literature attached to the appliance. Do not remove model/serial number plate.
- Cold temperatures can damage the electronic control. When using this appliance for the first time, or when the appliance has not been used for an extended period of time, be sure the appliance has been in temperatures above 32°F (0°C) for at least 3 hours before turning on the power to the appliance.
- Never modify or alter the construction of the appliance by removing the leveling legs, panels, wire covers, anti-tip brackets/screws, or any other part of the appliance.
- Be sure to have an appropriate foam-type fire extinguisher available, visible, and easily accessible located near the appliance.

## GROUNDING INSTRUCTIONS

- Proper Installation—Be sure your appliance is properly installed and grounded by a qualified technician. In the United States, install in accordance with the National Fuel Gas Code ANSI Z223.1/NPFA No. 54, latest edition and National Electrical Code NFPA No. 70 latest edition, and local electrical code requirements. In Canada, install in accordance with CAN/CGA B149.1 and CAN/CGA B149.2 and CSA Standard C22.1, Canadian Electrical code, Part 1-latest editions and local electrical code requirements. Install only per installation instructions provided in the literature package for this appliance.
- For personal safety, this appliance must be properly grounded. For maximum safety, the power cord must be securely connected to an electrical outlet or junction box that is the correct voltage, is correctly polarized and properly grounded, and protected by a circuit breaker in accordance with local codes.
- It is the personal responsibility of the consumer to have the appropriate outlet or junction box with the correct, properly grounded wall receptacle installed by a qualified electrician. It is the responsibility and obligation of the consumer to contact a qualified installer to assure that the electrical installation is adequate and is in conformance with all local codes and ordinances.

See the installation instructions packaged with this appliance for complete installation and grounding instructions.

## IMPORTANT SAFETY INSTRUCTIONS

### WARNING

- Avoid fire hazard or electrical shock. Failure to follow this warning may cause serious injury, fire, or death.
- Avoid fire hazard or electrical shock. Do not use an adapter plug, use an extension cord, or remove grounding prong from the power cord. Failure to follow this warning may cause serious injury, fire, or death.

### IMPORTANT INSTRUCTIONS FOR USING THE APPLIANCE

### WARNING

- **Storage In or On Appliance—Flammable** materials should not be stored in an oven or microwave, near surface burners or elements, or in the storage or warmer drawer (if equipped). This includes paper, plastic, and cloth items, such as cookbooks, plastic ware, and towels, as well as flammable liquids. Do not store explosives, such as aerosol cans, on or near the appliance.
- Do not leave children alone - Children should not be left alone or unattended in the area where appliance is in use. They should never be allowed to sit or stand on any part of the appliance, including the storage drawer, lower broiler drawer, warmer drawer, or lower double oven.
- Do not store items of interest to children in the cabinets above the appliance or on the backguards of ranges. Children climbing on or near the appliance to reach items could be seriously injured.
- Do not allow children to climb or play around the appliance. The weight of a child on an open oven door may cause the appliance to tip, resulting in serious burns or other injury. An open drawer when hot may cause burns.
- Stepping, leaning, or sitting on the door or drawers of this appliance can result in serious injuries and also cause damage to the appliance.

### WARNING

- Never cover any slots, holes, or passages in the oven bottom or cover an entire oven rack with any materials, such as aluminum foil or aftermarket oven liners. Aluminum foil and other liners may trap heat, causing a fire hazard.
- Never use your appliance as a space heater to heat or warm the room. Doing so may result in carbon monoxide poisoning and overheating of the appliance.

### CAUTION

- When heating fat or grease, watch it closely. Grease may catch fire if it becomes too hot.
- Do not use water or flour on grease fires. Smother fire or flame or use dry chemical or foam-type extinguisher. Cover the fire with a pan lid or use baking soda.
- Use dry potholders. Moist or damp potholders on hot surfaces may result in burns from steam. Do not let potholders touch hot cooking areas. Do not use towels or other bulky cloths.
- Do not heat unopened food containers - Build-up of pressure may cause container to burst and result in injury.
- Wear proper apparel - Loose-fitting or hanging garments should never be worn while using the appliance. Do not let clothing or other flammable materials contact hot surfaces.
- Do not touch surface burners or elements, areas near these burners or elements, interior surfaces of the oven, or the warmer drawer (if equipped). Surface burners and elements may be hot even though they appear cool. Areas near surface burners and elements may become hot enough to cause burns. During and after use, do not touch, or let clothing or other flammable materials touch these areas until they are cool. These areas may include the cooktop, surfaces facing the cooktop, oven vent areas, oven door, and oven window.

## IMPORTANT SAFETY INSTRUCTIONS

### CAUTION

Do not attempt to operate the appliance during a power failure. If the power fails, always turn off the appliance. If the appliance is not turned off and the power resumes, electric surface elements may resume operation when power is restored. Once the power resumes, reset the clock and the oven function.

### IMPORTANT INSTRUCTIONS FOR YOUR INDUCTION COOKTOP

### CAUTION

Persons with a pacemaker or similar medical device should exercise caution using or standing near an induction unit while it is in operation, as the electromagnetic field may affect the working of the pacemaker or similar medical device. It would be advisable to consult your Doctor or the pacemaker or similar medical device manufacturer about your particular situation.

- Know which knob or key controls each surface heating area. Place cookware with food on the cooking area before turning it on. Turn the cooking area off before removing the cookware.
- Cookware handles should be turned inward and not extend over adjacent surface elements. — To reduce the risk of burns, ignition of flammable materials, and spillage due to unintentional contact with the utensil, the handle of the cookware should be positioned so that it is turned inward, and does not extend over other cooking areas.
- Glazed cooking utensils — Only certain types of cookware are suitable for cook top service and must be magnetic to work properly on the induction zones. Check the manufacturer's recommendations for cook top use to ensure that the cookware is compatible with induction cooking.
- Improper cookware may break due to sudden changes in temperature. Check the cookware manufacturer's recommendations for cooktop use.
- Use proper pan size - This appliance is equipped with one or more surface units of different sizes. Select cookware with flat bottoms that match the surface unit size. Using the proper cookware on the cooking area will improve efficiency.

- Never leave surface elements unattended. Boil-overs may cause smoking and greasy spills that may ignite. A pan that has boiled dry could be damaged and may damage the cooktop.
- When you are flaming foods under a ventilating hood, turn on the fan.

### IMPORTANT INSTRUCTIONS FOR GLASS AND CERAMIC COOKTOPS

- Do not clean or operate a broken cooktop. If cooktop should break, cleaning solutions and spillovers may penetrate the broken cooktop and create a risk of electric shock. Contact a qualified technician immediately.
- Clean cooktop glass with caution. If a wet sponge or cloth is used to wipe spills on a hot cooking area, be careful to avoid a steam burn. Some cleaners can produce harmful fumes if applied to a hot surface.
- Avoid scratching the cooktop glass with sharp objects.

### IMPORTANT INSTRUCTIONS FOR CLEANING YOUR APPLIANCE

### CAUTION

- Before manually cleaning any part of the appliance, be sure all controls are turned off and the appliance is cool. Cleaning a hot appliance can cause burns.
- Clean the appliance regularly to keep all parts free of grease that could catch fire. Do not allow grease to accumulate. Greasy deposits in the fan could catch fire.
- Always follow the manufacturer's recommended directions for use of kitchen cleaners and aerosols. Be aware that excess residue from cleaners and aerosols may ignite causing damage and injury.
- Clean ventilating hoods frequently - Grease should not be allowed to accumulate on hood or filter. Follow the manufacturer's instructions for cleaning vent hoods.

## IMPORTANT SAFETY INSTRUCTIONS

### IMPORTANT INSTRUCTIONS FOR SERVICE AND MAINTENANCE

- Do not repair or replace any part of the appliance unless specifically recommended in the manuals. All other servicing should be done only by a qualified technician. This reduces the risk of personal injury and damage to the appliance.
- Always contact your dealer, distributor, service agent, or manufacturer about problems or conditions you do not understand.
- Ask your dealer to recommend a qualified technician and an authorized repair service. Know how to disconnect the power to the appliance at the circuit breaker or fuse box in case of an emergency.
- Remove the oven door from any unused oven if it is to be stored or discarded.
- Do not touch a hot oven light bulb with a damp cloth. Doing so could cause the bulb to break. Handle halogen lights (if equipped) with paper towels or soft gloves. Disconnect the appliance or shut off the power to the appliance before removing and replacing the bulb.

Important: This appliance has been tested and found to comply with the limits for a class B digital device, pursuant to Part 18 of the FCC rules (United States) and ICES-001 (Canada). These limits are designed to provide reasonable protection against harmful interference in a residential installation. This unit uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However there is no guarantee that interference will not occur in a particular installation. If this unit does cause harmful interference to radio or television reception, which can be determined by turning the unit off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antennae.
- Increase distance between unit and receiver.
- Connect the unit into an outlet or a circuit different from that to which the receiver is connected.

### IMPORTANT SAFETY NOTICE

The California Safe Drinking Water and Toxic Enforcement Act requires the Governor of California to publish a list of substances known to the state to cause cancer, birth defects or other reproductive harm, and requires businesses to warn customers of potential exposure to such substances.

# COOKTOP FEATURES

## Read these instructions carefully before using the cooktop

1. Left Rear Induction Element
2. Left Front Induction Element
3. Center Front Induction Element (36" model only)
4. Center Rear (30" model only) or Right Rear Induction Element (36" model only)
5. Right Front Induction Element
6. Left Front Element Control Knob & Indicator
7. Left Rear Element Control Knob & Indicator
8. Center Front Element Control Knob & Indicator (36" model only)
9. Center Rear Element Control Knob & Indicator
10. Right Front Element Control Knob & Indicator

### CAUTION

The Cooking Zones may appear to be cool while turned ON and after they have been turned OFF. **The glass surface may be HOT from residual heat transferred from the cookware and burns may occur.**

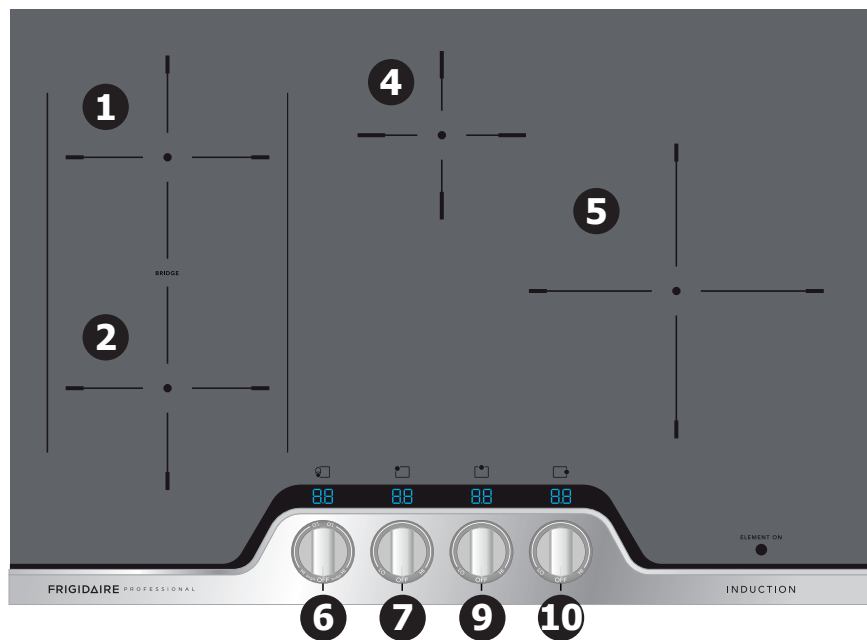

Figure 1  
30" Model

Figure 2  
36" Model

# BEFORE USING THE COOKTOP

## Induction Cooktop Features

**A COOLER COOKTOP-** A unique feature of the Induction Cooktop is whether turned ON or OFF, the cooktop surface remains cooler than standard ceramic cooktops.

**⚠ CAUTION** The Cooking Zones may appear to be cool while turned ON and after they have been turned OFF. The glass surface may be HOT from residual heat transferred from the cookware and burns may occur.

**MAGNETIC DETECTOR-** The coil sensor automatically detects whether the pan is magnetic and eliminates accidental "turn-On".

**PAN SIZE DETECTION-** The pan recognition sensor automatically detects and adapts the Cooking Zones to the pan sizes in use.

**EFFICIENT-** Induction cooking heats faster while using less energy. Induction power levels are quick to boil and when simmering.

## Use the Correct Cookware Type

For the induction zones, the magnetic Cooking Zone sensors located below the cooktop surface require the use of cookware made with magnetic material in order to start the heating process on any of the Cooking Zones.

When purchasing pans, look for cookware specifically identified by the manufacturer for use with Induction cooktops. If you are not sure, use a magnet to test whether the cookware type will work. If a magnet sticks to the bottom of the cookware, the material type is correct for Induction cooking (See Fig. 1).

Fig. 1

It is recommended to always use heavier high quality stainless steel cookware on your Induction Cooktop surface. This will greatly reduce the possibility of developing scratches on the ceramic surface.

Even quality cookware can scratch the cooktop surface, especially if cookware is slid over the ceramic cooktop surface without being lifted up. Over time sliding **ANY** type of cookware over the ceramic cooktop will likely alter the overall appearance of the cooktop. Eventually the buildup of scratches will make cleaning the surface difficult and degrade the overall appearance of the cooktop.

## Selecting Surface Cooking Cookware

The cookware used with the Induction Cooktop should have flat bottoms that make good contact with the entire surface of the Cooking Zone. Check for flatness by rotating a ruler across the bottom of the cookware (See Fig. 2). Be sure to follow all the recommendations for using cookware.

Figure 2

### Also remember to:

- Use cookware made with the correct material type for Induction Cooking.
- Use quality cookware with heavier bottoms for better heat distribution allowing for more even cooking results.
- The pan size should match the amount of food being prepared.
- Do not let pans boil dry. This may cause permanent damage in the form of breakage, fusion, or marring that can affect the ceramic cooktop. (This type of damage is not covered by your warranty).
- Do not use dirty pans with grease buildup. Always use pans that are easy to clean after cooking.

### ⚠ CAUTION

- The Cooking Zones may appear to be cool while turned ON and after they have been turned OFF. The glass surface may be HOT from residual heat transferred from the cookware and burns may occur.
- **DO NOT SLIDE** Cookware across the cooktop surface. Doing so may permanently damage the appearance of the ceramic cooktop.
- **DO NOT TOUCH HOT COOKWARE** or PANS directly with hands. Always use oven mitts or pot holders to protect hands from burns.

Prior to using your cooktop for the first time, apply a cooktop cleaning creme to the ceramic surface. Buff with a non-abrasive cloth or pad. This will make cleaning easier when soiled from cooking. The special cooktop cleaning cream leaves a protective finish on the glass to help prevent scratches and abrasions.

# BEFORE USING THE COOKTOP

## Cookware Recommendations

Be sure to follow the following recommendations for using cookware as shown:

INCORRECT	CORRECT
 <ul style="list-style-type: none"> <li>• Cookware not centered on Cooking Zone surface.</li> </ul>	 <ul style="list-style-type: none"> <li>• Cookware centered correctly on Cooking Zone surface.</li> </ul>
 <ul style="list-style-type: none"> <li>• Curved or warped pan bottoms or sides.</li> </ul>	 <ul style="list-style-type: none"> <li>• Flat pan bottom &amp; straight sides.</li> </ul>
 <ul style="list-style-type: none"> <li>• Pan does not meet the minimum size required for the Cooking Zone used.</li> </ul>	 <ul style="list-style-type: none"> <li>• Pan size meets or exceeds the recommended minimum size for the Cooking Zone.</li> </ul>
 <ul style="list-style-type: none"> <li>• Pan bottom rests on cooktop trim or does not rest completely on the cooktop surface.</li> </ul>	 <ul style="list-style-type: none"> <li>• Pan rests completely on the Cooktop surface.</li> </ul>
 <ul style="list-style-type: none"> <li>• Heavy handle tilts pan.</li> </ul>	 <ul style="list-style-type: none"> <li>• Pan is properly balanced.</li> </ul>

Fig. 1

### NOTE

ANY one of the incorrect conditions listed above in Fig. 1 may be detected by the sensors located below the ceramic cooktop surface. If the cookware does not meet any of these conditions, one or more of the Cooking Zones will not heat indicated by a flashing power level in the digital display for that affected zone. Correct the problems before attempting to reactivate the cooktop.

## Minimum Pan Size Requirements

### NOTE

Pan bottoms should not extend more than 1/2" (13mm) beyond outer Cooking Zone (Induction).

Fig. 2

Fig. 3

The Cooking Zones available on the Induction Cooktop require a **MINIMUM** pan size to be used at each location (Figs. 2 & 3).

The outer tips of each cooking zone cross-hair is helpful to determine the pan **MAXIMUM** size. After centering the cookware on the cooktop, make sure the cookware does not extend more than 1/2" beyond the thicker line on the Cooking Zone. The pan must make FULL contact on the glass surface without the bottom of the pan touching the metal cooktop trims.

### NOTE

If a pan made of the correct material is centered properly on any of the active Cooking Zones but is TOO SMALL, the affected Cooking Zone display will flash the power level and the pan will not heat.

# SETTING INDUCTION SURFACE CONTROLS

## The Electronic Surface Element Control

The Electronic Surface Element Control includes digital display windows. The control provides a numeric digital setting for the surface element positions on the cooktop. These settings work the same way as normal knob setting indicators work except the settings are displayed in digital windows (Figs. 1 thru 8).

### The available Display Settings

The control provides various heat levels from **Hi** (Fig. 2) to **Lo** (Fig. 4) and **OFF** (Fig. 1). The settings between **9.0** and **1.5** decrease or increase in increments of .5 (1/2).

### Hot Element Indicator Message (HE)

After using any of the element positions the cooktop will become very hot. Even after turning the control knob to OFF, the cooktop will remain hot for some time. The control monitors the temperature of the cooktop and displays the message "**HE**" (hot element) warning when the cooktop is still too hot to touch (See Fig. 5). If the **HE** message appears in the window, the control can still be turned ON again for use.

### Power Boost Indicator Message (Pb)

When an induction zone is first set at Hi, the Power Boost feature will turn on (see Fig. 6). The Power Boost feature is used to bring large quantities of water or food to cooking temperature at the fastest speed possible. The Power Boost feature will give you up to 139% power output for a set amount of time (approx. 10 min).

### Error Indicator Message

An error message will be displayed at power up (or after a power failure) if ANY of the surface control knobs were left in the ON positions. If any control knobs were turned on during a power failure of more than 10 seconds, the display will show an "**Er**" message. If a power failure should occur, be sure to set all of the surface control knobs to the OFF position. This will reset the surface controls.

The induction zones are equipped with a pot detection system. If the controls are activated and the detection system cannot find any pot of the correct material on the zone, it will flash its power level for 3 minutes. After flashing for 3 minutes, the digital display will show an "- -" message.

Error message "**C**" will only appear during a fault condition. Error messages "**Er**" and "- -" may appear on display after an invalid action by the user. Set surface control knob to the OFF position to reset the control.

Once the surface controls have been set to the OFF positions, the surface controls should return to normal operation. If the surface controls do not function and the "**C**", "**Er**", or "- -" message remains in any display after following these procedures, contact your authorized servicer for assistance.

Fig. 1

Fig. 2

Fig. 3

Fig. 4

Fig. 5

Fig. 6

**Control knobs shown are typical only.**

## Surface cooking settings

Use the chart to determine the correct setting for the type of food you are preparing.

**Note:** The size and type of cookware used will influence the setting needed for best cooking results.

Recommended Setting for Surface Element	
Setting	Type of Cooking
HIGH (HI)	Start most foods; bring water to a boil and pan broiling.
MEDIUM HIGH (8-10)	Continue a rapid boil; frying, deep fat frying.
MEDIUM (6)	Maintain a slow boil; thicken sauces and gravies; steaming vegetables.
MEDIUM LOW (2 - 4)	Keep foods cooking; poaching and stewing.
LOW (LO)	Keep warm, melting and simmering.

# SETTING INDUCTION SURFACE CONTROLS

## Operating the Single Induction Surface Elements

The cooktop is equipped with 3 (or 4) single induction surface elements: the RIGHT FRONT, CENTER and REAR positions (Figure 1 and 2).

### To Operate the Induction Surface Elements

1. Place the correctly sized cookware of the proper material on the induction surface element.
2. Push in and turn the surface control knob in either direction to the desired setting (Figure 3).

Note: Turning the knob to Hi from Off will activate the Power Boost feature. The Power Boost feature is used to bring large quantities of water or food to cooking temperature at the fastest speed possible. The Power Boost feature will give you up to 139% power output for a set amount of time (approx. 10 min). The increased power output will vary per zone.

3. Turn the knob to adjust the setting if desired. Start most cooking operations on a higher setting and then turn to a lower setting to finish cooking. Each surface element provides a constant amount of heat at each setting.
4. When cooking has completed, turn the surface control knob to **OFF** before removing the cookware.

Figure 1

Figure 2

Figure 3

Control knob shown is typical only.

### NOTE

The surface "**Element On**" indicator light will glow when one or more induction elements are turned on. A quick glance at this indicator light when cooking is finished is an easy check to be sure all surface induction elements are turned off.

### NOTE

See Recommended Surface Cooking Settings table on page 10.

### CAUTION

**Do not place plastic items such as salt and pepper shakers, spoon holders or plastic wrappings on cooktop when it is in use.** These items could melt or ignite. Potholders, towels or wooden spoons could catch fire if placed too close to the surface elements.

### CAUTION

**Do not allow aluminum foil, or ANY material that can melt to make contact with the ceramic glass cooktop.** If these items melt on the cooktop they will damage the ceramic cooktop.

### CAUTION

The glass cooktop may appear to have cooled after the elements have been turned OFF. The induction elements do not heat directly the cooktop but heat will be transferred from the cookware to the glass cooktop. **HE** (Hot Element) message will turn ON and will continue to glow until the glass cooktop has cooled down to a moderate level. **The glass surface may still be hot** and burns may occur if the glass surface is touched before the indicator light has turned **OFF**. The message may remain on even though the controls are turned **OFF**.

# SETTING INDUCTION SURFACE CONTROLS

## Bridge Induction Surface Radiant Element

The cooktop features with a "BRIDGE" induction element on the left side. (See Figures 1 & 2) positions. The bridge can be used with rectangular or oval shaped cookware such as a griddle. The bridge feature maintains an even temperature setting across both elements. The "bridge" mark on the knob indicates that both front and rear portions will heat (Fig. 4). You may switch from bridge to single elements settings at any time during cooking. To switch settings, turn the front left control knob to OFF first. The cooktop will triple beep and flash the display if the knob is not turned OFF before switching settings.

### To Operate the Bridge Induction Element as a single element:

If needed for normal cookware, the Bridge induction element can work like a single induction element without the Bridge (See Figure 5). The "single" mark on the knob indicates that only the front portion will heat (Fig. 3).

1. Place the correctly sized cookware on the induction bridge surface element.
2. Push in and turn the control knob as shown in Figure 3 to heat the front portion of the Bridge element for normal shaped cookware.
3. Turn the knob to adjust the setting if needed. Start most cooking operations on a higher setting and then turn to a lower setting to finish cooking. Each induction element provides a constant amount of heat at each setting. Please note that not all cookware will fit the Bridge element correctly.
4. When cooking has completed, turn the surface control knob to **OFF** before removing the cookware.

Figure 1

Figure 2

Figure 3

Front left control knob

Figure 4

Front left control knob

Figure 5  
Front portion only

Figure 6  
Front plus Rear

### NOTE

The surface "**Element On**" indicator light will glow when one or more induction elements are turned on. A quick glance at this indicator light when cooking is finished is an easy check to be sure all surface induction elements are turned off.

See Recommended Surface Cooking Settings table on page 10.

## SETTING INDUCTION SURFACE CONTROLS

### To Operate the Bridge Induction Element:

1. Place the correctly sized cookware on the induction bridge surface element.
2. Push in and turn the control knob as shown in Figure 4 for larger or rectangular shaped cookware. The "bridge" mark on the knob indicates that both front and rear portions will heat.
3. Turn the knob to adjust the setting if needed. Start most cooking operations on a higher setting and then turn to a lower setting to finish cooking. Each induction element provides a constant amount of heat at each setting. Please note that not all cookware will fit the Bridge element correctly.
4. When cooking has completed, turn the surface control knob to **OFF** before removing the cookware.

### NOTE

Both left front and rear elements must be **OFF** before activating the bridge element. Bridge element will only operate by using the front left control knob. The left rear knob cannot be used while in bridge mode. The cooktop will triple beep and the display will flash until the left rear knob is turned OFF if the cooktop is already in bridge mode.

Turning on the front left knob to activate the bridge element while the left rear element is on will also cause the cooktop to triple beep and the display will flash until the left rear knob is turned OFF.

Figure 4  
Front left control knob

Figure 6  
Front plus Rear

# SETTING INDUCTION SURFACE CONTROLS

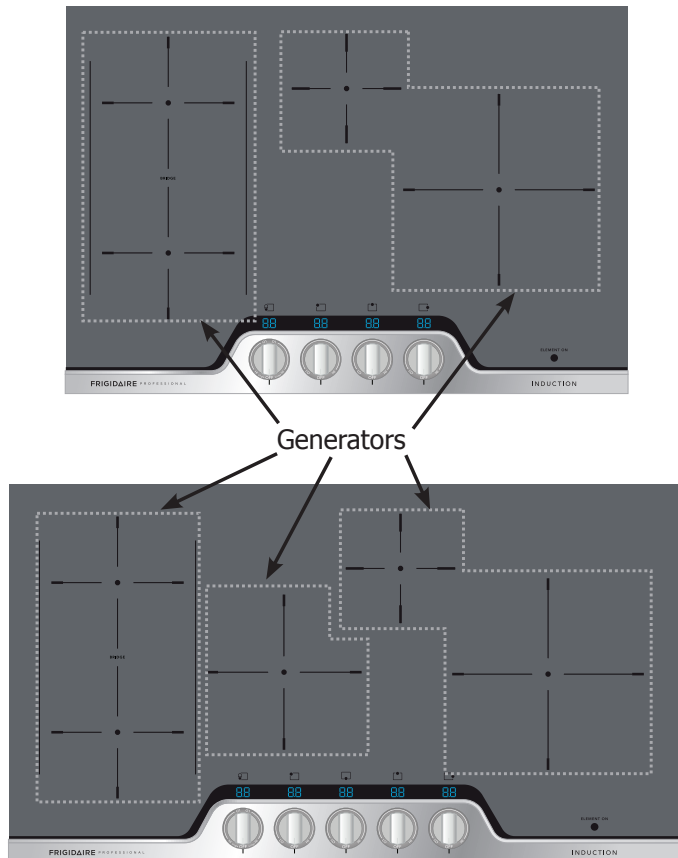

## Power Management

In order to give you more flexibility, your induction cooktop is equipped with more cooking zones than the number of induction generators. Each of those generators is assigned to power a specific cooking zone. One or two cooking zones are assigned to each generator. If you use more than one cooking zone at high power on the same generator, the generator may need to manage its power to both cooking zones.

Depending on the size of your cooktop, 2 or 3 generators are available:

- The 30" cooktop is equipped with 4 cooking zones within 2 sections.
- The 36" cooktop is equipped with five cooking zones within 3 sections.

**To get the highest power output from your cooking zones**, start your cooking process on only one cooking zone within the heating section and then add your second cookware on the second cooking zone when the first one has already reached its cooking temperature.

## Preheat Recommendations

When preheating a pan on the cooktop always watch carefully. Whenever using the cooktop, always pay attention to any items cooking and remain attentive until the cooking process is complete.

Keep in mind that induction may decrease the amount of time required to preheat a cooking utensil.

## Operational Noises

The electronics generating the induction fields are pretty much noiseless but they do produce heat at high power level. A soft-sounding cooling fan activates when the unit is running multiple cooking zones at once or when a cooking zone is set at very high power settings.

The buzzing sound you could hear from your cooktop is not coming from the electronics but from the cookware you are using. Here are some causes of this noise:

- Most induction-ready cookware are made of several layers of materials. An encapsulated steel layer is usually used to harness the induction field and transform it into heat, which is then transferred to the other materials by radiant energy. The induction field will cause the steel layer to vibrate against the other materials in which it is encapsulated. This is the most common cause of noise from the induction process. This buzzing only happens at the higher power level settings. Note that high quality cookware manufacturers weld this steel layer in place which lowers or cancel this noise.
- Light weight cookware may also vibrate. We recommend using heavy weight quality cookware.
- Cookware with warped bottoms can vibrate on the ceramic glass surface at high power settings.
- **CAUTION** The power output of your induction cooktop is capable of warping an empty pan. Never use the higher power settings on an empty pan. Even the highest quality cookware is vulnerable to warping.
- Riveted handles on cookware can also cause buzzing sounds from the vibrations.
- Solid cast iron and enamelware cookware should not emit any noise. Top quality cookware made of several layers should also be relatively quiet.

## Cleaning Various Parts of Your Cooktop

Before cleaning any part of the cooktop, be sure all controls are turned OFF and the cooktop is COOL. REMOVE SPILLOVERS AND HEAVY SOILING AS SOON AS POSSIBLE. REGULAR CLEANINGS NOW WILL REDUCE THE DIFFICULTY AND EXTENT OF A MAJOR CLEANING LATER.

Surfaces	How to Clean
<b>Stainless Steel</b> Decorative Trim Cooktop, Control Knobs, Control Panel	<b>Wipe the control panel clean after each use. Before cleaning the control panel,</b> turn all controls to OFF and remove the control knobs. To remove, pull each knob straight off the shaft. Clean using hot, soapy water and a cloth. <b>Do not use cleaners with high concentrations of chlorides or chlorines.</b> Do not use harsh scrubbing cleaners. Be sure to squeeze excess water from the cloth before wiping the panel; especially when wiping around the controls. Excess water in or around the controls may cause damage to the appliance. Only use kitchen cleaners that are especially made for cleaning stainless steel. Always be sure to rinse the cleaners from the surface as bluish stains may occur during heating that cannot be removed. To replace knobs after cleaning, line up the flat sides of both the knob and the shaft; then push the knob into place.
<b>Ceramic Glass Cooktop</b>	See <b>Ceramic Glass Cooktop</b> in this Owner's Guide.

## Ceramic Glass Cooktop Cleaning & Maintenance

**Consistent and proper cleaning is essential to maintaining your Ceramic glass cooktop.**

Prior to using your cooktop for the first time, apply a ceramic cooktop cleaning cream (available in most hardware, grocery and department stores) to the ceramic surface. Clean and buff with a clean paper towel. This will make cleaning easier when soiled from cooking. Cooktop cleaning creams leave a protective finish on the glass to help prevent scratches and abrasions.

Sliding aluminum or copper clad bottom pans on the cooktop can cause metal markings on the cooktop surface. These marks should be removed **immediately** after the cooktop has cooled using the cooktop cleaning cream. Metal marks can become permanent if not removed prior to future use.

Cookware (cast iron, metal, ceramic or glass) with rough bottoms can mark or scratch the cooktop surface. **Do not slide anything metal or glass** across the cooktop. **Do not** use your cooktop as a cutting board or work surface in the kitchen. **Do not** cook foods directly on the cooktop surface without a pan. **Do not** drop heavy or hard objects on the glass cooktop, or they may crack it.

## CARE & CLEANING

### Cleaning Recommendations for the Ceramic Glass Cooktop

#### CAUTION

Before cleaning the cooktop, be sure the controls are turned to **OFF** and the cooktop is **COOL**.

#### WARNING

**DO NOT** use a cooktop cleaner on a hot cooktop. The fumes can be hazardous to your health, and can chemically damage the ceramic glass surface.

#### For light to moderate soil:

Apply a few drops of cleaning creme directly to the cooktop. Use a paper towel or use a **non-abrasive** plastic type **no-scratch** pad to clean the entire cooktop surface. Make sure the cooktop is cleaned thoroughly, leaving no residue.

#### For heavy, burned on soil:

Apply a few drops of cleaning Creme directly to the soiled area. Rub the soiled area using a **non-abrasive** plastic type **no-scratch** pad, applying pressure as needed. Do not use the pad you use to clean the cooktop for any other purpose.

#### IMPORTANT

Damage to the ceramic glass cooktop may occur if you use an abrasive type scratch pad. Only use cleaning products that have been specifically designed for ceramic glass cooktop.

If soils remain, carefully scrape soils with a metal razor blade scraper, holding scraper at a 30 degree angle to the surface. Remove loosened soils, then apply a few drops of cleaning cream and buff surface clean.

#### Plastic or foods with a high sugar content:

These types of soils need be removed immediately if spilled or melted onto the ceramic cooktop surface. Permanent damage (such as pitting of the cooktop surface) may occur if not removed **immediately**. After turning the surface elements **OFF**, use a razor blade scraper or a metal spatula with a mitt and scrape the soil from the hot surface (as illustrated). Allow the cooktop to cool, and use the same method for heavy or burned on soils.

#### Do not use the following on the ceramic glass cooktop:

- **Do not use abrasive cleaners and scouring pads, such as metal and some nylon pads. They may scratch the cooktop, making it more difficult to clean.**
- **Do not use harsh cleaners, such as chlorine bleach, ammonia or oven cleaners, as they may etch or discolor the cooktop.**
- **Do not use dirty sponges, cloths or paper towels, as they can leave soil or lint on the cooktop which can burn and cause Special Caution for Aluminum Foil and Aluminum Cooking Utensils**

- **Aluminum foil**  
Use of aluminum foil will damage the cooktop. Do not use under any circumstances.
- **Aluminum utensils**  
Since the melting point of aluminum is much lower than that of other metals, care must be taken when aluminum pots or pans are used. Pans that boil dry may permanently damage cooktop by breaking, fusing to, or marking it.

### Care and Cleaning of Stainless Steel

Some models are equipped with stainless steel exterior parts. Special care and cleaning are **required** for maintaining the appearance of stainless parts. Refer to the **General Care & Cleaning** table for detailed cleaning instructions.

## BEFORE YOU CALL (Solutions to Common Problems)

### IMPORTANT

**Before you call for service**, review this list. It may save you time and expense. The list includes common occurrences that are not the result of defective workmanship or materials in this appliance.

<b>OCCURRENCE</b>	<b>POSSIBLE CAUSE/SOLUTION</b>
<b>Entire cooktop does not operate.</b>	<p>House fuse has blown or circuit breaker has tripped. Check/reset breaker or replace fuse. If the problem is a circuit overload, have this situation corrected by a qualified electrician.</p> <p>Make sure household electrical circuit breaker is ON and that power is properly supplied to the Cooktop.</p> <p>Service wiring is not complete. Contact installation agent or dealer.</p> <p>Electrical power outage. Check house lights to be sure. Call your local electric company for service.</p>
<b>Cooktop turns OFF while cooking.</b>	<p>Cooktop internal heat sensor has detected high temperatures inside the appliance. Be sure the appliance vent holes are not blocked. Refer to the Installation Instructions supplied with the cooktop for more detailed cooktop installation information.</p>
<b>Cooking Zone does not heat food (Power level is flashing).</b>	<p>No cookware was placed on the Cooking Zone, or the cookware material type is incorrect for Induction Cooking.</p> <p>Cookware bottom not large enough for Cooking Zone.</p> <p>Cookware is warped or in poor condition.</p> <p>Cookware is not centered on Cooking Zone.</p> <p>Cookware resting on cooktop trim or does not rest completely on cooktop surface.</p>
<b>Cooking Zone does not heat food.</b>	<p>No power to the appliance. Check steps under "Entire cooktop does not operate" in this checklist.</p> <p>Incorrect Cooking Zone control setting. Make sure the correct control is ON for the Cooking Zone being used.</p>
<b>Cooking Zone heats food too hot or not hot enough.</b>	<p>Incorrect power level setting. Adjust the power level setting higher or lower and refer to recipe for guidance and adjust accordingly.</p>
<b>Food does not heat evenly.</b>	<p>Lightweight or warped pans were used. Be sure to use good quality cookware.</p> <p>Use only flat bottom, evenly balanced medium or heavyweight cookware. Heavy and medium weight pans heat evenly. Because lightweight pans heat unevenly, foods may burn more easily.</p> <p>Adjust Cooking Zone power level setting until the proper amount of heat is obtained.</p>
<b>Poor cooking results.</b>	<p>Many factors affect cooking results. Adjust the recipe's recommended power levels or cooking times.</p> <p>Cookware is too lightweight or warped. Use heavier quality cookware so foods being prepared may cook more evenly.</p>
<b>Cooktop Zone Control displays C and displays a 3 digits error code.</b>	<p>Induction Cooktop main control has detected a fault or error condition. Try turning electrical power supply OFF and back ON to cooktop in order to reset Cooktop main controls. If fault recurs, record fault number and turn power supply to Cooktop OFF. Call service for assistance.</p>

## BEFORE YOU CALL (Solutions to Common Problems)

OCCURRENCE	POSSIBLE CAUSE/SOLUTION
<b>Cooking Zone LED continuously flashes.</b>	<p>Induction Cooktop pan detection sensors do not see the correct cookware. Test with a magnet to be sure cookware is made with Induction compatible material.</p> <p>Cookware has been removed from the Cooking Zone without turning the Cooking Zone OFF. Place cookware back on to the Cooking Zone or if finished cooking turn off the affected Cooking Zone.</p> <p>Cookware is not centered over the Cooking Zone properly. Refer to page 7 for correct cookware placement.</p>
<b>Metal marks on ceramic cooktop surface.</b>	<p>Sliding or scraping of metal utensils on cooktop surface. DO NOT slide cookware or cooking utensils across the cooktop surface. Use the recommended ceramic glass cooktop cleaning creme to remove the marks. See "Cooktop Cleaning &amp; Maintenance" in the General Care &amp; Cleaning section.</p>
<b>Scratches or abrasions on ceramic cooktop surface.</b>	<p>Coarse particles such as salt or sand between cooktop and cookware or cooking utensils can cause scratches. Be sure cooktop surface and bottoms of utensils are clean before placing on cooktop. Small scratches do not affect cooking and will become less visible with time.</p> <p>Cleaning materials not recommended for ceramic-glass cooktop have been used. See "Cooktop Cleaning &amp; Maintenance" in the General Care &amp; Cleaning section.</p> <p>Cookware with rough bottoms was used. Use smooth, flat-bottomed cookware ONLY.</p>
<b>Brown streaks or specks on ceramic cooktop surface.</b>	<p>Boil overs are cooked onto cooktop surface. Use a razor blade scraper to remove soil. See "Cooktop Cleaning &amp; Maintenance" in the General Care &amp; Cleaning section.</p>
<b>Areas of discoloration with metallic sheen on ceramic cooktop surface.</b>	<p>Mineral deposits from food and/or water. Remove using a ceramic-glass cooktop cleaning creme. Remember to use cookware with clean, dry bottoms. For more information See "Cooktop Cleaning and Maintenance" in the General Care &amp; Cleaning section.</p>
<b>Cooktop makes buzzing noise.</b>	<p>Cookware is damaged. Please see pages 6 &amp; 7 of this manual. Also see "Operational noise" section on page 11.</p>

### Error Codes Display Message

If an error occurs in any of the zones, the C0 error message will display in zones 1 or 2 on the left side of the cooktop. If the error occurs while either of the first two zones have been on and the zone is hot enough to display HE, the error message will override the hot element warning.

## MAJOR APPLIANCE WARRANTY

Your appliance is covered by a one year limited warranty. For one year from your original date of purchase, Electrolux will pay all costs for repairing or replacing any parts of this appliance that prove to be defective in materials or workmanship when such appliance is installed, used and maintained in accordance with the provided instructions.

### **Exclusions This warranty does not cover the following:**

- 1 Products with original serial numbers that have been removed, altered or cannot be readily determined.
- 2 Product that has been transferred from its original owner to another party or removed outside the USA or Canada.
- 3 Rust on the interior or exterior of the unit.
- 4 Products purchased "as-is" are not covered by this warranty.
- 5 Food loss due to any refrigerator or freezer failures.
- 6 Products used in a commercial setting.
- 7 Service calls which do not involve malfunction or defects in materials or workmanship, or for appliances not in ordinary household use or used other than in accordance with the provided instructions.
- 8 Service calls to correct the installation of your appliance or to instruct you how to use your appliance.
- 9 Expenses for making the appliance accessible for servicing, such as removal of trim, cupboards, shelves, etc., which are not a part of the appliance when it is shipped from the factory.
- 10 Service calls to repair or replace appliance light bulbs, air filters, water filters, other consumable, or knobs, handles, or other cosmetic parts.
- 11 Surcharges including, but not limited to, any after hour, weekend, or holiday service calls, tolls, ferry trip charges, or mileage expense for service calls to remote areas, including the state of Alaska.
- 12 Damages to the finish of appliance or home incurred during installation, including but not limited to floors, cabinets, walls, etc.
- 13 Damages caused by: services performed by unauthorized service companies; use of parts other than genuine Electrolux parts or parts obtained from persons other than authorized service companies; or external causes such as abuse, misuse, inadequate power supply, accidents, fires, or acts of God.

### **DISCLAIMER OF IMPLIED WARRANTIES; LIMITATION OF REMEDIES**

Customer's sole and exclusive remedy under this limited warranty shall be product repair or replacement as provided herein. Claims based on implied warranties, including warranties of merchantability or fitness for particular purpose, are limited to one year or the shortest period allowed by law, but not less than one year. Electrolux shall not be liable for consequential or incidental damages such as property damage and incidental expenses resulting from any breach of this written limited warranty or any implied warranty. Some states and provinces do not allow the exclusion or limitation of incidental or consequential damages, or limitations on the duration of implied warranties, so these limitations or exclusions may not apply to you. This written warranty gives you specific legal rights. You may also have other rights that vary from state to state.

### **If You Need Service**

Keep your receipt, delivery slip, or some other appropriate payment record to establish the warranty period should service be required. If service is performed, it is in your best interest to obtain and keep all receipts. Service under this warranty must be obtained contacting Electrolux at the addresses or phone numbers below.

This warranty only applies in the USA and Canada. In the USA, your appliance is warranted by Electrolux Major Appliances North America, a division of Electrolux Home Products, Inc. In Canada, your appliance is warranted by Electrolux Canada Corp. Electrolux authorizes no person to change or add to any obligations under this warranty. Obligations for service and parts under this warranty must be performed by Electrolux or an authorized service company. Product features or specifications as described or illustrated are subject to change without notice.
