Installation Specifications

1. Measure the height, width and depth of the opening, making sure to include baseboards, molding tile, countertop overhang, etc. Check to be sure there is enough room to open the door (consider walls, islands or other obstacles when measuring).
2. Refer to illustration below to determine dimensions.
3. Allow 2.5" of clearance on hinge side of refrigerator when installing next to a wall where handle may make contact.
4. Allow 1" minimum clearance at rear for proper air circulation and water/electrical connections. Allow a 3/8" minimum clearance at sides and top for ease of installation.
5. Ensure each door and entryway in the home is wide enough for the refrigerator to be moved through easily.

For optimal usage and ability to open refrigerator doors completely, do not install next to a wall.

Please note: The following dimensions and cutout information is for planning purposes only. For complete installation details, consult manual packed with product or download manual online at samsung.com.

Standard-Depth Refrigerator
 Standard-depth refrigerators typically measure 30 to 35 inches in depth, as opposed to counter-depth refrigerators that sit flush with cabinetry.

Installation clearances

- ✓ Allow 3 3/4" of clearance when installing along a wall. This will allow for the door to open 90 degrees without the handle contacting the wall.
- ✓ Allow 2" minimum clearance at rear for proper air circulation and water/electrical connections.
- ✓ Allow a 3/8" minimum clearance at sides and top for ease of installation.

For optimal usage and ability to open refrigerator doors completely, do not install next to a wall.

Please note: The above dimensions and cutout information is for planning purposes only. For complete installation details, consult manual packed with product or download manual online at samsung.com.

Walk the delivery route

- ✓ Identify the narrowest opening that the appliance will travel through, from outside the home to the location where it will be installed.
- ✓ Appliance depth or width must be smaller than the width of the narrowest opening.
