

# MEDIUM-DUTY ST 224 SERIES SNOW THROWER

## LED LIGHT

Husqvarna has removed the headlights from the console and placed a 9 LED Light closer to the operator's working area. This gives the operator more usable light.

## STEEL DISCHARGE CHUTE

Husqvarna's ST 200 comes with a steel discharge chute for long term durability. The direction can be easily adjusted from the operator controls.

## OPERATORS CONSOLE

Husqvarna ST 200 Series has an operator console featuring steel framework for the cables that attach to the remote chute deflector and speed adjustment. ST 200 Series is equipped with power steering.

## ADJUSTABLE HANDLE HEIGHT

Husqvarna Snow Throwers feature adjustable handle height, 200-Series and above. To adjust, remove top wing nuts and loosen bottom wing nuts, place both top bolts in desired height hole, four to choose from, and tighten all wing nuts.

## BUCKET FEATURES

Husqvarna ST 200 Series of snow throwers are dual stage. The bucket has a 23" intake height. After the snow has been ingested into the machine a 12" 3-Blade Weldment Impeller ejects it from the metal discharge chute. The auger gear box is made of durable aluminum.
